

FREDDY THE FIRE POSTERS

Freddie

DON'T LEAVE HIM ALONE!
Help keep Freddie's anxieties in check and be careful with flammable materials pls!

We all have anxieties (especially living with all the stress of modern society, rip).
For Freddie, being near flammable material makes him anxious. Keep Freddie and yourself safe by being careful when near flammable materials!

A MESSAGE FROM THE NORTH VANCOUVER FIRE DEPARTMENT

Freddie

DON'T LEAVE HIM ALONE!
When you leave Freddie alone, he gets lonely. Make sure you stick with him while cooking!

We've all experienced moments of absentmindedness (or have simply gotten distracted from a notification on our phone) while cooking with the stove.
Next time you're cooking, remember that not burning down your house > anything else.

A MESSAGE FROM THE NORTH VANCOUVER FIRE DEPARTMENT

Freddie

DON'T LEAVE HIM ALONE!
Be careful when you dispose of your fireworks, or Freddie will cancel you on Twitter.

Fireworks are lit, but can be very dangerous when not handled properly (duh).
When you're using fireworks, make sure you're doing so in a safe area without any flammable material nearby, and be sure to dispose of them properly!
